IOSCO publishes Report on Supervisory Technology (SupTech)

The International Organization of Securities Commissions (IOSCO) published today its [Report on Supervisory Technology \(“SupTech”\)](#). The Report is a summary of a survey of 49 jurisdictions on their current and expected future use of SupTech tools for supervision and regulatory oversight.

Authorities are increasingly seeking to integrate SupTech into core supervisory functions. **Artificial intelligence, data access, and cloud infrastructure** are seen as critical enablers, with efficiency, timeliness of information reception and analysis, and improved capabilities driving adoption.

Consumer and investor protection, along with **capital markets supervision**, are currently the most developed areas of SupTech application, but interest is shifting toward new domains such as digital assets.

Authorities primarily use **mid-level technologies**, supported by transaction data and traditional fraud tools. High-tech ambitions remain strong, particularly for advanced analytics and machine learning, but funding gaps are slowing progress. Cyber risks and resource constraints remain significant barriers for further SupTech adoption overall.

The report also highlights the need for more **structured long-term workforce planning** to complement the integration of SupTech tools. External hiring is currently prioritized over internal capability building, and upskilling efforts rely heavily on online and ad hoc training.

The Report was coordinated by IOSCO's **SupTech Forum**, established in 2026 as a space of exchange and discussion for regulators on the ways technologies are changing and shaping their work.

“SupTech is becoming an essential part of modern securities regulation. This report shows that authorities are increasingly using technology to enhance the efficiency, timeliness and effectiveness of supervision, while also recognising the importance of sound governance, cyber resilience and appropriate resources. As markets evolve, IOSCO will continue to support its members in sharing experience and building supervisory capabilities that promote investor protection, market integrity and financial stability.”

- **Jean-Paul Servais**, *IOSCO Board Chair*

“The SupTech Forum was created to provide a platform for regulators around the globe to exchange experiences and insights, at both strategic and technical levels, on how technology is reshaping supervision.

This report highlights both the progress made and the challenges that remain, particularly in the areas of data, cybersecurity, skills and funding. It also sheds light on the opportunities ahead and the potential for technology to further strengthen the effectiveness and efficiency of supervision.

The Forum’s ongoing work, including the launch of the SupTech Sprint on Digital Assets in Zurich next week, further illustrates the value of practical collaboration in supporting authorities as they explore the use of SupTech to supervise rapidly evolving sectors such as digital assets.”

- **Marlene Amstad**, *Chair of IOSCO’s SupTech Forum, Chair of the Swiss Financial Market Supervisory Authority (FINMA)*

Notes to Editors

1. IOSCO is the leading international policy forum for securities and derivatives regulators and the global standard setter for financial markets regulation. It develops, implements and promotes adherence to internationally recognized standards for financial markets regulation and works closely with other international organizations on the global regulatory reform agenda.

2. The Organization's membership regulates more than 99% of the world's securities markets in over 130 jurisdictions. By providing high quality technical assistance, education, and training, IOSCO supports its members to come together to achieve the following three objectives:

- Enhance investor protection;
- Ensure markets are fair and efficient; and
- Promote financial stability by reducing systemic risk.

3. The IOSCO Board is the governing and standard-setting body of IOSCO and is made up of 35 securities regulators. Mr. Jean-Paul Servais, the Chair of Belgium's Financial Services and Markets Authority (FSMA), is the Chair of the IOSCO Board. Dr. Islam Azzam, Executive Chairman, Financial Regulatory Authority, Egypt, Mr. Toshiyuki Miyoshi, Vice Minister for International Affairs, Financial Services Agency, Japan, Mr. Mark T. Uyeda, Commissioner, US Securities and Exchange Commission (SEC) and Mr. Grant Vingoe, Chief Executive Officer, Ontario Securities Commission (OSC) are Vice-Chairs of the IOSCO Board.

4. The Growth and Emerging Markets (GEM) Committee is the largest Committee within IOSCO, representing more than 75% of the IOSCO membership, including ten of the G20 members. The Committee unites members from growth and emerging markets and communicates their views at other global regulatory discussions. It is chaired by Dr. Islam Azzam, Executive Chairman, Financial Regulatory Authority, Egypt.

5. IOSCO counts four regional committees: (1) Africa / Middle-East (AMERC), chaired by H.E. Waleed Saeed Al Awadhi, Chief Executive Officer, Securities and Commodities Authority, United Arab Emirates; (2) Asia & Pacific (APRC), chaired by Ms. Julia Leung, Chief Executive Officer of the Hong-Kong Securities and Futures Commission; (3) European Regional Committee (ERC), chaired by Mr. Jean-Paul Servais; and (4) Inter-American Regional Committee (IARC), chaired by Ms. Christina Rolle, Executive Director, Securities Commission of The Bahamas.

6. IOSCO's General Secretariat is headquartered in Madrid, Spain. The Secretariat supports and coordinates the work of IOSCO and is comprised of permanent staff and member secondees. It is led by Rodrigo Buenaventura who was appointed IOSCO's Secretary General in January 2025.
